

RE: Healthcare Legislation

Dear \_\_\_\_\_,

As one of your constituents, I am writing to express my view regarding pending changes to the American health care system. I have deep concerns about the direction and speed with which Congress is approaching this complex issue.

I believe that a more measured approach is prudent to begin the journey to improvements to health insurance and healthcare. I am advocating four measures to initiate the process of reducing health care costs:

- Initiate aggressive Medicare/Medicaid fraud enforcement as already proposed by congress.
- Institute tort reform and limit awarding of punitive damages in malpractice cases.
- Institute lawsuit abuse reforms by establishing a “loser pays” framework.
- Aggressively enforce border security to reduce the strain on our health care system from illegal immigrants.

Thank you for your attention to this matter,
